The Monte Rio Sewer is not necessary. From start to end, of voting, EIR reports, etc, it is all flawed and full of many fraudulent aspects, as well as conflict of interest issues. The sewer project with its plant at Sheridan Meadow would cause unrecoverable damage, pollution of the Russian River, thus Coho Salmon and other fish, otters, birds, and the entire eco system. Please do NOT all this project.

PLEASE DO NOT provide any funding to this project.

George C.F. Reding
[REDACTED]

G.Reding is also a website domain owner of www.riverpages.com which also shows opposition to the sewer project, and against the Redevelopment project. A mature and educated adult, age 56, HIV now for 24+ years. Please DO NOT allow the poisoning of the river and our environment. There have never been "sewage running down the streets" as the press wrote several times. Individual septic "do" work in this area, with acid soils, redwoods uptake several hundred gallons of water per day. I know of one owner who had soils downhill from septic tested and results were NO fecal coliform. Please DO NOT fund this project. FRAUD ISSUES EXIST.
